当然。这是一个重新设计的多页网站方案, 它保留了谷歌风格的美感

整体设计和导航

核心设计仍然简洁, 但现在结构分布在多个页面上, 以提供更多细节。

- 持久标题:每个页面上都会出现一个干净的标题,确保轻松导航。
 - 左侧: 您的姓名Zirui Wen. 也可作为返回主页的链接¹。
 - 右侧:导航链接:Projects, , , , Experience。SkillsPapers
 - 联系按钮:最右侧有一个独特的药丸形按钮:"联系",可以链接到页脚或专用联系表单。
- 一致的页脚: 每个页面上都有一个简单的页脚, 其中包含指向您的 LinkedIn 的链接 2 , GitHub 3 以及电子邮件地址 4 。

第1页:主页

目标:提供令人信服的摘要,说明您是谁,并引导访问者访问您网站的最相关部分。

- 英雄部分:
 - 主标题: Zirui Wen 5
 - 副标题: AI程序员 | 研究员
 - 引言:简短而有影响力的陈述。
 - 例如: "我致力于构建和优化智能系统,在大型语言模型、强化学习和全栈应用程序 开发方面拥有丰富的经验。目前担任史蒂文斯理工学院的研究助理。"⁶⁶⁶"
- 特色项目部分:
 - 布局: 2 张或 3 张卡片的网格, 以预告形式展示您的顶级项目。
 - 卡片内容:每张卡片都有项目标题、一句话摘要和一个链接到项目页面上的完整条目的 "查看项目"按钮。
 - 特色项目1:自动提示优化⁷
 - 特色项目2: Liar's Bar: 贝叶斯强化学习⁸
 - 特色项目 3: Apex Legend Al Aimbot9

- "我做什么"部分:
 - 布局: 简洁的三列布局, 带有图标。
 - 第1栏(人工智能和机器学习):简要提及你在法学硕士(LLM)、RAG和强化学习方面的工作¹⁰¹⁰。
 - 第 **2** 列 (后端和数据): 记录您使用 Flask、FastAPI 和 Spring Boot 以及 MongoDB 和 PostgreSQL 等数据库构建可扩展后端的经验¹¹¹¹¹¹¹¹¹¹¹¹。
 - 第 **3** 列(前端和 **UI**):提及使用 React 和 Next.js 构建交互式前端¹²。
- 号召行动:底部的最后、明确的提示。
 - 例如: "更详细地了解我的工作或查看我的完整技术技能列表。"按钮链接到项目和技能 页面。

第2页:项目

目标:一个专门的、可过滤的作品库。

- 布局:项目卡的整页网格。
- 过滤:在顶部,包括过滤"芯片"以按类别对项目进行排序,例如:All、、、、LLM。 Reinforcement LearningComputer VisionOptimization
- 项目卡(详细视图):
 - 项目名称:例如, "医疗提示的自动提示优化"¹³。
 - 详细描述:使用简历中的要点来描述项目的特点和您的成就。
 - 设计了一个使用基于文本的梯度下降自动优化医疗提示的系统, 将 LLM 性能提高了 20%¹⁴。
 - 使用 Flask、FastAPI 和 LangChain 开发了可扩展的后端¹⁵。
 - 使用 React、Redux 和 Next.js 构建交互式前端¹⁶。
 - 通过 Docker 部署服务并使用 PostgreSQL 进行数据管理¹⁷。
 - 技术栈:用小标识或标签列出所使用的技术(例如FastAPI,,,,)
 ReactLangChainDocker¹⁸。
 - 链接:突出显示"在 GitHub 上查看"按钮 ¹⁹和

第3页:经验与教育

目标:以清晰、按时间顺序的格式呈现您的职业和学术历史。

- 专业经验部分:
 - 布局:清晰的垂直时间线。
 - 入选者1: 史蒂文斯理工学院研究助理²⁰
 - 日期:现在²¹
 - 职责:
 - 通过集成 RAG 和知识图谱(Neo4j、LangChain、FAISS)提高了 LLM 性能²²。
 - 进行统计建模、时间序列分析和假设检验²³。
 - 使用 PyTorch 实现强化学习算法(DQN、PPO)²⁴。
 - 参赛作品二:西门子数据团队助理实习生 25
 - 日期: 2023年11月-2024年3月²⁶
 - 职责:
 - 使用 Spring Boot 和 REST API 为 Vue.js 前端构建后端服务器²⁷。
 - 利用MongoDB优化大规模客户数据存储²⁸。
 - 使用 Python 脚本自动清理和处理数据²⁹。
- 教育科:
 - 布局:时间线下方有一个单独的部分,其中包含每个程度的卡片。
 - 卡片 1: 史蒂文斯理工学院 应用人工智能硕士(2024 年 9 月至今)30303030
 - 卡片 2: 伯明翰大学 应用数学理学士(2020 年 9 月 2024 年 6 月)³¹³¹³¹³¹
 - 卡片 3: 暨南大学 信息与计算机科学学士学位(2020 年 9 月 2024 年 6 月)³²³²³²³²

第4页:技能

目标:全面、分类地概述您的技术技能。

- 布局:页面按类别分类。使用关键技术的徽标,使其更具视觉吸引力。
- 第一部分:语言
 - Python, C++, Java, Javascript, TypeScript, HTML, CSS, Mysql, R³³.
- 第二部分:人工智能与机器学习
 - 库和框架: TensorFlow、PyTorch、Scikit-learn、OpenCV³⁴。
 - 概念与专长: NLP、LLM、LangChain、FAISS、Neo4j、进化算法、博弈论、强化学习、假设检验³⁵³⁵³⁵。
- 第3部分:后端和数据库
 - 框架: Flask、FastAPI、Spring Boot³⁶。
 - 数据库和工具: MySQL、PostgreSQL、MongoDB、Redis、REST API³⁷。
- 第4部分:前端
 - Vue.js, React Native, Next.js, Redux, Material-UI³⁸.
- 第5部分: DevOps 和工具
 - Docker、Git、CUDA³⁹。

第5页:论文

目标:以专业、正式的方式展示您的学术出版物。

- 布局:简单、干净的列表格式, 类似于 Google Scholar 上的格式。
- 出版物条目:
 - 标题: "利用体征预测 COVID-19 感染。"⁴⁰
 - o **Authors: Zirui Wen**, Junjie Zhang, and Yuhao Zhang⁴¹.

- 期刊/会议: 云计算、性能计算和深度学习国际会议 (CCPCDL 2022)。第 12287 卷。SPIE,
 2022
 42。
- 链接:如果可用,请提供"[PDF]"、"[DOI]"或"[查看出版物]"按钮。
- 摘要(可选):您可以在条目下方添加简短的斜体摘要以增加背景信息。

Let's evolve the multi-page concept into a complete design prototype, infusing it with specific UI/UX principles from Google's **Material Design 3 (M3)**. This will serve as a detailed blueprint for building your portfolio.

Part 1: Global Design System (The "Google Style" Foundation)

These principles will be applied consistently across all pages to create a cohesive and intuitive user experience.

1. Color: Dynamic & Tonal

We'll build a palette based on a single "seed" color—the classic Google Blue—to generate a full range of harmonious, accessible tones.

- Seed Color: #0b57d0 (Google Blue)
- Surface Tones (Backgrounds):
 - Surface: #f7f9fc (A very light, slightly cool gray for the main background)
 - Surface Container: #f0f3f8 (A slightly darker background for elements like cards)
- Primary Tones (Interactive Elements):
 - Primary: #0b57d0 (For main buttons, active links, selected chips)
 - o **On-Primary:** #ffffff (Text/icons on top of the primary color)
 - **Primary Container:** #d3e3ff (A lighter tint for less important primary elements)
 - o On-Primary Container: #001849 (Text/icons on top of the primary container color)
- Outline: #6e7781 (For borders on cards and text fields)

2. Typography: Clear & Scalable

Using the **Roboto** font family for its clarity and versatility on digital screens.

- **Display Large:** 48px, Bold (For your name on the Home page)
- Headline Large: 32px, Bold (For page titles like "Projects")
- **Title Large:** 22px (For card headers, experience titles)
- Body Large: 16px (For main paragraph text)
- **Body Medium:** 14px (For descriptions, metadata)
- Label Large: 14px, Medium weight (For buttons)

3. Layout & Spacing: Consistent & Adaptive

- **Grid:** A responsive 8dp grid system. All spacing (margins, padding) will be a multiple of 8 (e.g., 8px, 16px, 24px).
- Adaptive Navigation:
 - Desktop/Tablet: A persistent Navigation Rail on the left side with icons and text labels (Home, Projects, Experience, Skills, Papers). This is a hallmark of Google web apps like Gmail and Google Cloud.
 - **Mobile:** The Navigation Rail is hidden. A **Top App Bar** contains a hamburger menu icon, which opens a Modal Navigation Drawer.

4. Iconography: Material Symbols

We will exclusively use icons from the **Material Symbols** library. They should be set to the "Outlined" style for a modern, lightweight feel.

Part 2: The Complete Design Prototype (Page by Page)

Page 1: Home

UX Goal: Immediately establish your identity and guide users to your most important work.

- Layout: Centered content in a large viewport.
- Component Breakdown:
 - Navigation: Left-side Navigation Rail (Desktop) or Top App Bar (Mobile).
 - Hero Section:
 - Text: Zirui Wen in Display Large typography.
 - **Subheading:** A div below with the text "Al Programmer | Researcher" using **Headline Large** typography but a lighter font weight.
 - Introduction: A short paragraph ¹¹ in

Body Large.

- Call-to-Action Buttons (CTA):
 - A **Filled Button** with the label "View My Projects". This is the primary action.
 - An **Outlined Button** next to it with the label "Download CV". This is a secondary action.
- Featured Projects Section:
 - **Header:** "Featured Projects" (Title Large).
 - Layout: A responsive grid of 2-3 Elevated Cards. The elevation (shadow) makes them pop, signaling their importance.
 - Card Content:
 - Project Title (e.g., "Automatic Prompt Optimization") ² in

Title Large.

- One-sentence summary in Body Medium³.
- A Text Button labeled "Learn More →" that links to the Projects page.

Page 2: Projects

UX Goal: Allow users to easily browse and filter your work, diving into the details of what interests them.

- Layout: Full-width page with filtering options at the top.
- Component Breakdown:
 - Page Title: "Projects" in Headline Large.
 - Filter Bar:
 - A row of **Filter Chips**. When a chip is selected, its state changes to "selected" (using the Primary Container color).
 - Chips: All, LLM ⁴,

```
Reinforcement Learning <sup>5</sup>,

Computer Vision <sup>6</sup>,

Full-Stack<sup>7</sup>.
```

Project Gallery:

- A responsive grid of **Outlined Cards**. The outlined style is less visually heavy than elevated cards, making it ideal for a gallery.
- Card Content:
 - Title: e.g., "Liar's Bar: Bayesian Reinforcement Learning" 8 (

Title Large).

■ **Description:** Bullet points from your resume detailing your accomplishments ⁹ (

Body Large).

- **Technology Stack:** A section with **Input Chips** for each technology used (e.g., PyTorch, Flask, Kubernetes)¹⁰.
- Action Bar: A div at the bottom of the card with two Text Buttons:
 - One with a GitHub icon labeled "View on GitHub" 11.
 - One with an external link icon labeled "Live Demo" (if applicable).

Page 3: Experience & Education

UX Goal: Present your career and academic journey in a clear, chronological, and easily scannable format.

- Layout: A single column with distinct sections for Experience and Education.
- Component Breakdown:
 - Page Title: "Experience & Education" in Headline Large.
 - Experience Timeline:
 - A vertical line down the center of the section.
 - Each job is an **Outlined Card** attached to the timeline.
 - Card Content:
 - **Title:** "Research Assistant" ¹² (

Title Large).

■ Metadata: "Stevens Institute of technology | Now" ¹³ (

Body Medium, with a different color).

■ **Description:** Bulleted list of your key achievements from the resume ¹⁴ (

Body Large).

- Education Section:
 - A sub-header "Education" (Title Large).
 - A grid of 2-3 **Filled Cards**. The filled style subtly differentiates this section from the experience timeline.
 - Card Content:
 - **Degree:** "MS in Applied Artifical Intelligence" ¹⁵ (

Title Large).

■ Institution: "Stevens Institute of technology" ¹⁶ (

Body Large).

■ **Dates:** "Sept 2024-Now" ¹⁷ (

Body Medium).

Page 4: Skills

UX Goal: Provide a comprehensive, organized, and visually engaging overview of your technical capabilities.

- Layout: A categorized layout that groups skills logically.
- Component Breakdown:
 - o Page Title: "Technical Skills" in Headline Large.
 - Skill Categories:
 - Each category (e.g., "Languages", "Al & Machine Learning") is a sub-header (Title Large).
 - Under each header, skills are represented as **Input Chips**. This is visually more appealing than a simple list.
 - Example (AI & Machine Learning section): A flow layout of chips: Python ¹⁸,

```
PyTorch 19,
```

```
TensorFlow <sup>20</sup>,

LLM <sup>21</sup>,

LangChain <sup>22</sup>,

Reinforcement Learning <sup>23</sup>,

RAG <sup>24</sup>,

Knowledge Graphs <sup>25</sup>,

Neo4j <sup>26</sup>,

FAISS<sup>27</sup>, etc.
```

Page 5: Papers

UX Goal: Present your academic work in a professional, citation-friendly format.

- Layout: A simple, elegant list.
- Component Breakdown:
 - Page Title: "Publications" in Headline Large.
 - Publication Entry:
 - Each paper is contained within its own **Card** (can be Outlined or just a div with a bottom border for separation).
 - Paper Title: "COVID-19 Infection Prediction using Physical Signs." ²⁸ in

Title Large.

■ Authors: "Zirui Wen, Junjie Zhang, and Yuhao Zhang." ²⁹ in

Body Large. Your name should be bold.

■ Publication Info: "International Conference on Cloud Computing... SPIE, 2022" ³⁰ in

Body Medium, italicized.

■ Action Buttons: A row of Text Buttons for "[PDF]", "[DOI LINK]", or "[VIEW PUBLICATION]".
